

AltaLIS announces two new products

April 01, 2002

AltaLIS is pleased to announce two new additions to its existing suite of property mapping products. Effective immediately, **ATS Linework** and **Municipal Boundaries** are available through the AltaLIS order desk.

The **Legal Sub Division (LSD) and Quarter Section linework** products feature road allowance, LSD, quarter section linework, and includes quarter section descriptors and combined scale factors. The provincial coverage of 7165 townships is packaged in 50 files. (Each file approximating the coverage of one 1:250 000 NTS mapsheet.) The accuracy is +/- 3 metres and is in-sync with the cadastral base.

The **Municipal Boundary** product offers provincial coverage of Municipal boundary linework, featuring rural municipalities, cities, towns, villages, summer villages and hamlets at an accuracy of +/- 3 metres. The file is kept current by GOA Municipal Orders in Council, and is in-sync with the cadastral base.

For more information and to download a sample, please visit the Product Samples and Data Ordering page on this website, or call our order desk at (403) 716-3490.
