

AltaLIS Data for Web & Hardcopy Publishers

March 1, 2001

Publishers Package Highlights

Hardcopy publishers or Webmap solution providers wishing to enhance their own products with AltaLIS base map data will find this package gives them affordable access as well as data redistribution rights.

AltaLIS recognizes that some of our customers wish to publish and redistribute their own data along with select areas of our digital map datasets. The AltaLIS Publishers package recognizes your original purchase of our data and then combines the same 'map tile pricing' allowing you to redistribute through view/print media (such as hardcopy, CDROM or on the Web).
