

AltaLIS Unveils New User Bulletin Board

March, 2004

AltaLIS has added a bulletin board to our web site to promote “Users Helping Users”.

The AltaLIS Bulletin Board is designed to promote open exchanges between data users. It provides an opportunity to seek input from other users on a variety of subjects as well as an open forum to discuss ideas and experiences.

For the roll-out, we have broken the bulletin board into three categories; Mapping Products, Technical, and Municipalities, with three subcategories in each one; General, Experiences, and Seeking Assistance.

Though the intent of this board is to give our data users a place to exchange ideas, experiences, and for troubleshooting, it is not a technical support or help desk supported by AltaLIS. For questions, please continue to call the AltaLIS Order Desk at 403-716-3490 or email us at info@atlalis.com.
