Daily DIDs Updates!

On average, there are over 1000 Disposition (DIDs) updates integrated into the base every month! AltaLIS understands the requirement of accessing current data, and have reengineered our data output and distribution system to provide daily updates, effective **August 1st, 2011**.

Clients are encouraged to access the current provincial coverage or individual 250K tiles through the AltaLIS Virtual Order Desk (VOD) whenever they are required. DIDs 250K tiles are maintained in two formats: SHP & DWG. Daily updates **only** affect the provincial and 250K DIDs coverage in SHP format. The DWG format will remain on a monthly schedule.

Throughout the month of July, DIDs provincial and 250K SHP files will be updated more frequently as we work through the implementation, but the 'official' start date of DIDs daily updates is August 1st.

The feedback AltaLIS has been receiving on the DIDs product has been very positive and we are excited to make daily updates available to industry. Please contact our Order Desk at **403-716-3490** or email **info@altalis.com** if you have any questions regarding this change.
